

A wide range of LV capacitors which offers Long Life, Reliability and safety.

**AB-LIFASA**  
CAPACITORS

## Technical Features

- ◆ AB Lifasa Capacitors are a **dry type**, covered with a thermo hardening encapsulation of high dielectric properties.
- ◆ AB Lifasa Capacitor Losses are specially reduced.  
**Dielectric losses <0.2 w/Kvar**  
**Total losses <0.5 w/Kvar**
- ◆ AB Lifasa Capacitors are made up of dielectric consisting of metalised polypropylene **Self-Healing Type** foil.
- ◆ AB Lifasa Capacitors are **Explosion Proof**. Each element is individually protected with metal fuse (Patented system) & **Over pressure disconnecter**.
- ◆ AB Lifasa capacitors offer **Long Life expectancy**.
- ◆ AB Lifasa capacitors offer **very high over loading capacity**.
- ◆ AB Lifasa capacitors offer **low weight & volume**.  
**Easy to install** any where without any problem
- ◆ AB Lifasa capacitors offer **highest Security**.
- ◆ AB Lifasa capacitors meet the regulation **VDE 560, EN6083-1, BS1650 & IEC 831 - 1 & 2**.

## Certification & Approvals :

Most of our products are having following approvals.

## FM Series

## POLB Series

## Reinforced Capacitors FMR Series
